

Switzerland VHK 817.022.15 - metal and metalloid maximum levels

Karen Pendergrass · ORCID 0000-0002-2348-7259 · 2017-05-01

Karen Pendergrass. "Switzerland VHK 817.022.15 - metal and metalloid maximum levels".
<https://heavymetalcertified.com/regulations/switzerland-vhk-817-022-15-metal-metalloid-limits>. Retrieved 2026-09-27.

The instrument

This page records the heavy-metal maximum levels set by Switzerland VHK 817.022.15 - metal and metalloid maximum levels, the instrument of Swiss Federal Department of Home Affairs (EDI), 2017. Every value below is transcribed into the Heavy Metal Index register from the primary text and is the value an HMTc standard cites when this jurisdiction binds a certification limit. It is a record of law, not an HMTc threshold.

Transcribed into the Heavy Metal Index regulatory register from the primary text published by Swiss Federal Department of Home Affairs (EDI); a direct primary-source URL is not tracked for this instrument.

Maximum levels

All values µg/kg (ppb), in the basis the instrument states. 218 maximum levels across 8 analytes and 152 product categories, grouped by analyte and ordered by limit.

Where HMTc cites it

Cells where this instrument holds the strictest government value in force among credible regulators, and therefore binds a published HMTc limit.

NO PUBLISHED STANDARD IS BOUND BY THIS INSTRUMENT YET

A limit recorded above binds nothing today only because another government holds a stricter value for every published cell. It may still bind later, as other jurisdictions relax or as a new subcategory is published.

How this interacts with HMTc

HMTc certification standards adopt the *strictest existing* maximum level set by any credible government, applied cell-by-cell. Where this instrument holds the strictest value for a (product, analyte) cell, it binds the HMTc limit and the standard cites this page. This page does not set or justify any HMTc threshold; it records the sovereign requirement the program measures against.

A reference page is a record of law, not an HMTc threshold. It states what a government requires; the standard page states what the program requires, and names which instrument binds each cell.
